

# Structural Stands

Lowry Manufacturing designs and builds structural stands to support many brands of round hopper bins.

- Stands can be designed to hold round bins up to 24 feet in diameter.
- The drive-through height and width can be customized to meet the customer's specifications.
- The bolt-together design of Lowry structure can be easily transported to a construction site, and can be assembled using a minimal of labor and time.
- All structures are built to high manufacturing standards, and conform to current structural codes.
- Lowry Manufacturing welders are highly trained and are ASME certified.
